Skills

- **Programming & Frameworks:** Java, Spring Boot, Hibernate, JPA, Maven, Spring Security, HTML, CSS, Javascript.
- **DevOps & CI/CD:** Jenkins, GitHub Actions, Docker (CLI, Dockerfile, Docker Compose).
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, VPC/Subnets.
- **Databases & Data Management:** MySQL, MongoDB.
- **API Development & Testing:** Postman
- **Version Control System :** Git, GitHub.
- **Operating Systems:** Linux / Unix fundamentals.

Projects

Machine Events Backend System

[GitHub](#)

Tech Stack: Java, Spring Boot, JPA, H2, REST APIs

- Built a Spring Boot backend to ingest and **deduplicate machine events** with **validation** and update handling.
- Ensured thread-safe ingestion using **transactions** and **database-level uniqueness constraints**.
- Implemented time-based **statistics APIs** to compute **machine health** and **defect metrics**.
- Added **integration tests** for ingestion logic, concurrency, and data correctness.

Task Manager System (Trello-lite)

[GitHub](#)

Tech Stack: Java, Spring Boot, Hibernate/JPA, Maven, MySQL

- Developed a **RESTful API** using Java, Spring Boot, Hibernate (JPA), and MySQL to manage projects, tasks, and user roles.
- Implemented **user management** with registration, login, profile view, and role-based access (USER/ADMIN).
- Built **project and task management features**, allowing creation, assignment, and status tracking of tasks within projects.
- Applied **Spring Data JPA, validation, and Lombok** for efficient database interaction, code simplification, and maintainable architecture.

Recruitment Management System

[GitHub](#)

Tech Stack: Java, Spring Boot, REST APIs, JWT, Resume Parser API

- **Developed backend** supporting user profiles, resume uploads (PDF/DOCX), and **secure role-based access**.
- Integrated **third-party API** for automated resume parsing and applicant data extraction.
- **Implemented and tested RESTful APIs** for job postings, applicant browsing, and application submission using **Postman**.
- **Enabled admin features** to manage job openings and review extracted applicant information.

Simulations

Wells Fargo Software Engineering job simulation

[Certificate](#)

- Understood relevant requirements for building a system to manage financial portfolios.
- Drafted a visual representation of the data as an entity relationship diagram (ERD).
- Used the IntelliJ developer application to implement the ERD and published it to GitHub.

VERIZON Cloud Platform Job Simulation

[Certificate](#)

- Analyzed cloud-native VPN solution for scalability and security.
- Used Python CLI tools to test application behavior.
- Summarized security strategies in a presentation for stakeholders.

Certifications

- **Oracle – Professional Developer 2025** [Link](#)
- **Forage – Back-End Engineering Program** [Link](#)

Education

- **Bachelor of Technology (CSE)** || O.P Jindal University || 2022-2026 || **CGPA :8.5**
- **Higher Secondary School (XII)** || Jawahar Navodaya Vidyalaya || 2021 || **91%**
- **Secondary School (X)** || Jawahar Navodaya Vidyalaya || 2019 || **94 %**
